Handling of TALENT-KEYHOLE Photography  
(RUFF) in Preliminary Phases

1. Procedures: The following procedures should be used as a guide in the preparation of the OAK report from RUFF materials:

a. During the preliminary interpretation at NPIC by the community, only personnel authorized for that immediate task will be allowed in the areas designated for OAK preparation in NPIC.

b. No information will be transmitted from NPIC through briefings, telephone calls, or written memoranda bearing upon the substance of the interpretation until the OAK is produced. If information has been uncovered deemed critical by the agencies participating, a flash report will be issued to the community simultaneously.

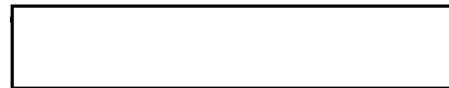

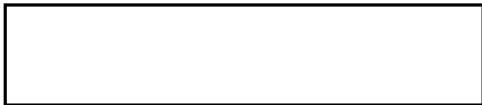

c. As soon as briefing materials are available on highlights (which is likely to occur prior to the completion of the OAK), the Office of the DDI/CIA will take responsibility for arranging a briefing for the USIB to be presented by the Director, NPIC, with briefing representatives available from each agency participating in the readout, such briefing to include an operational briefing by the Acting Chief, DPD, if relevant.

2. Priority for Raw Materials:
